

### System Key

- (a)** Trim Cover
- (b)** Adjustment Block
- (c)** Lever Bracket
- (d)** Mounting Plate

### Adjusting Your Cassette's Fit

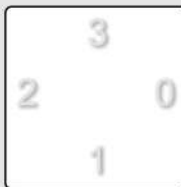

#### Adjustment Option 1 - The cassette is too tight

- Slide the lever bracket (c) and mounting plate (d) out of the left side of the cassette.
- You can now access the adjustment block (b) to deduct 1-3mm from the width of the cassette by rotating the block to the -1, -2 or -3 position and replacing it into the mounting plate.
- Push the mounting plate and lever bracket back into the cassette and try it again at the window recess.
- Repeat until the fit is correct, then move to step 3.

#### Adjustment Option 2 - The cassette is too loose

- Slide the lever bracket (c) and mounting plate (d) out of the right side of the cassette.
- You can now access the adjustment block (b) to add 1-3mm from the width of the cassette by rotating the block to the 1, 2 or 3 position and replacing it into the mounting plate.
- Push the mounting plate and lever bracket back into the cassette and try it again at the window recess.
- Repeat until the fit is correct, then move to step 3.
